Summary: AI and Data Analyst with experience in SQL, Python, and enterprise automation, specializing in transforming business workflows into scalable, data-driven solutions through analytics, reporting systems, and AI-enabled automation.

Experience

AI Systems Analyst, Lanco Group of Companies, Homewood, IL

August 2025 - April 2026

- Maintained and updated an Azure-based AI Copilot that retrieved operational data with 100% accuracy and automated order creation, significantly reducing manual processing time.
- Evaluated 20+ business use cases from sales teams to identify opportunities for automation, consistently prioritizing initiatives based on complexity, security, and expected efficiency gains.
- Built Salesforce-based workflows to automate opportunity creation, including dynamic pricing adjustments and selective product exclusion.
- Automated Confluence documentation generation for SPIDs via Jira Automation, eliminating manual entry and improving data consistency while reducing data entry time by 90%.
- Implemented a version control system using a Bitbucket pipeline and PowerShell scripts to automatically recreate project environments.

Research Assistant, Illinois Institute of Technology, Chicago, IL

January 2025 - May 2025

- Thoroughly reviewed studies regarding the top-k problem via efficient parallel sorts on GPU architectures, including the bitonic Top-K sort.
- Investigated performance bottlenecks in two C++-based gradient retrieval sorts in a Linux environment to optimize sorting.

Salesforce Intern, Dotsolved Inc, Chicago, IL

June 2024 - August 2024

- Developed an AI-enabled chatbot (Einstein) that automated handling of 100+ service cases, reducing manual workload.
- Earned Salesforce Ranger certification (111 badges), demonstrating proficiency in CRM systems and workflow automation.

Teacher's Assistant, Illinois Institute of Technology, Chicago, IL

August 2023 - November 2023

- Taught Python programming, emphasizing data structures and recursive algorithms through weekly interview questions that reinforced concepts.
- Assisted students with programming and debugging across 7 assignments, ensuring student proficiency in Python and data structures.
- Conducted weekly review sessions and delivered detailed post-exam feedback, improving students' test scores and conceptual understanding.

Scouting 2009 - Present

- Achieved Eagle Scout on 1/15/20, earned 36 merit badges and supervised the construction of a footbridge to improve hiking access.

Projects

Gym Analytics System

April 2026 - May 2026

- Developed a relational PostgreSQL schema to model gym operations, including members and engagement history to support behavioral analysis.
- Defined SQL-based metric key performance indicators (including retention rate, churn, no show rate) to standardize business logic across dashboards.
- Conducted exploratory data analysis (EDA) to identify trends in member behavior, peak usage periods, and attendance variability across classes and trainers.
- Integrated PostgreSQL backend with Streamlit frontend to depict 8 dashboards to visualize key operational metrics including class popularity, attendance distribution, engagement segmentation, and retention performance.

Education

Illinois Institute of Technology, Chicago, Illinois

August 2021 - May 2025

Coterminal Program: BS in Computer Engineering, MAS in Artificial Intelligence; earned 181 credits.

Relevant Coursework: Database Organization, Data Structures and Algorithms, Machine Learning

GPA: 3.754 | Dean's List (7 semesters)

Skills

Data & Analytics: Excel, Power Bi

Programming Languages: Python, C, Java, Javascript, HTML, CSS, Matlab

AI, Automation, & Platforms: Azure, Atlassian (Bitbucket, Confluence, Jira Automation), n8n, Powershell, Salesforce (Einstein, Agentforce), Render, Neon

Relational Databases: MySQL, PostgreSQL

Packages/Libraries/Frameworks: Flask, Matplotlib, NumPy, Pandas, Scikit-learn, Streamlit

Operating Systems: Windows, Linux, Ubuntu, xv6-riscv, Virtuoso

Technical Skills: Exploratory data analysis, data modeling, data structures, programming, project planning and execution, teaching

Languages: Fluent in English, Spanish and Tamil
